

CURRICULUM:

If your child attends school, your school should have sent home curriculum and a schedule. This would be the best schedule to follow to help your child build on the skills they were previously working on.

If you are looking for additional help or other guided plans, here are a few FREE online educational programs and resources that can help guide your child through the necessary skills for their age and skill level.

Ambleside Online

Ambleside Online is a free, Charlotte Mason-style, Christian-based homeschool curriculum for children in grades K-12. Ambleside has a long-standing reputation in the homeschooling community as a quality resource.

Besides their online program, Ambleside has put together a page full of lessons, activities and ideas for educational learning during a crisis or event. Check out the link for more info:

Khan Academy

Khan Academy also has a long-standing reputation as a quality resource in the homeschooling community. It is a non-profit educational site started by American educator Salman Khan to provide free, quality educational resources for all students.

Organized by topic, the site includes math (K-12), science, technology, economics, art, history, and test prep. Each topic includes lectures delivered via YouTube videos.

Students can use the site independently, or parents can create a parent account, then set up student accounts from which they can track their child's progress.

Easy Peasy All-in-One Homeschool

Easy Peasy All-in-One Homeschool is a free online resource created by homeschooling parents for homeschooling parents. It contains full homeschool curriculum from a Christian worldview for grades K-12

First, parents choose their child's grade level. The grade level material covers the basics, such as reading, writing, and math. Then, the parent selects a program year. All of the children in a family will work together on history and science covering the same topics based on the program year chosen.

Easy Peasy is all online and free. It's all planned out day by day, so children can go to their level, scroll down to the day they are on, and follow the directions. Inexpensive workbooks are available to order, or parents can print the worksheets from the site at no cost (other than ink and paper).
